

## INNOVATION GRANTS PROGRAM

For the innovative improvement of undergraduate science, technology, engineering and mathematics (STEM) education in West Virginia

---

### PROGRAM ANNOUNCEMENT

WVSR.ING.2019 (replaces ING.2018.WV.02)

**Proposal Deadline:** September 28, 2018 (due by 5 p.m.)

#### Eligibility

- *Organization:* Primarily undergraduate colleges and universities (PUIs) in West Virginia. Faculty from West Virginia University and Marshall University are ineligible; however, proposals will be accepted from branch campuses of these universities.
- *Principal Investigator (PI) Eligibility:* Full-time faculty from four-year PUIs in West Virginia. PIs who have received innovation awards in the two prior years are only eligible to receive an award in this competition as a supplement to a National Science Foundation (NSF) funded project.
- *Limit on Proposals:* No institution may submit more than two (2) innovation proposals per year.

#### Award Information

- *Type of Award:* Cost Reimbursable
- *Anticipated Award Date:* November 15, 2018
- *Award Period:* 12 months
- *Estimated Number of Awards:* 2
- *Maximum Funding per Award:* \$40,000
- *Anticipated Total Funding:* \$80,000
- *Cost Share Requirement:* 50%

#### Program Description

The purpose of the West Virginia Science and Research (WVSR) Innovation Grants Program is to encourage undergraduate students in West Virginia to continue careers in science, math and engineering. Like Instrumentation Grants, the Innovation Grants Program seeks to accomplish this by supporting the purchase of modern instruments and supplies and conduct minor renovations for advanced undergraduate laboratories. However, the Innovation Program seeks to target larger, more ambitious, cohesive, and/or more comprehensive innovations in laboratory/classroom settings. Further, submission of proposals to NSF and other award programs, both public and private, utilizing WVSR support as a foundation for more advanced or competitive proposals, is encouraged. Curriculum enhancements and innovations in classroom instruction, delivery and pedagogy are central interests of Innovation awards. Equipment and materials purchased should be used primarily for instructional purposes but may also be used to enhance faculty research programs that actively include undergraduates a primary participants. It is anticipated that an award will be made to one private and one public institution of higher education based upon the quality of proposals received.

Proposals in any STEM field will be considered. No institution may submit more than two (2) proposals in one year. Investigators who received awards in the prior two years are only eligible to receive an award in this competition as a supplement to an NSF-funded project. Investigators who have not received an Innovation award in the last two years may have a direct award of up to \$40,000 from WVSR or use the Innovation Grant funds as a supplement to an NSF award. Proposals from Marshall University or West Virginia University main campuses will not be considered; however, proposals from university branch campuses are eligible.

Institutional support of at least 50% is required as a cost share. An in-kind cost share of up to \$10,000 for matching institutional support is allowed.

Competition for funds is strong, and WVSR receives far more proposals than can be supported. Proposals must be submitted via the Grant Opportunity (GO!) system (<http://wvresearch.org/go2/>). To apply, you must be registered as a GO! user. If you are not currently registered, go to the login page and click on the Register button in the menu panel on the left. Choose a user name and password. It's recommended that you use your institutional e-mail address as the user name. Choose a password that you can remember, as they cannot be retrieved from the database. We request that you provide contact data by clicking on the View, Edit User Profile button. We also request that you upload your NSF-style or other brief biographical sketch by clicking on the Upload Biographical Sketch button on the User Profile page. These data take the place of the traditional cover sheet.

You may edit your submission at any time until the end of the application period. This includes uploaded documents - uploading a new document replaces the previously uploaded document. Do NOT check the Submit Final box until you are finished and are satisfied with your proposal and be sure to click on the Save button after checking Submit Final. Help with the GO! system is available by clicking the Help button in the menu panel on the left.

## **Application**

Log in to your account on GO! and click on the View, Respond to Open RFPs or View, Edit, Submit Proposals button in the menu panel on the left. Select the Instrumentation Grants Program announcement from the list of open RFPs. Enter a title for your proposal. Since this grant program limits institutional submissions to two, you should notify your chairman or dean if you intend to submit a proposal. Once the appropriate academic official has approved your submission, check the Has Institutional Approval box to indicate you have approval.

*NOTE: The entire proposal including the Project Summary and Project Description needs to be uploaded as a single word processing or PDF document using the upload button (up-arrow icon) in the Action column on the far right.*

**Project Summary:** Provide a one-page summary of your project.

**Project Description:** Proposals should contain the following information and should not exceed four pages of single-spaced type in a legible font such as 10-point Arial or 12-point Times New Roman.

- Current situation in the institution, the students served and the department.
- Plans to seek alternative sources of support for the project. Senior faculty who have not sought NSF support or other educational grants for the project must provide a statement explaining plans to seek support.
- How will this award benefit the professional career growth of the faculty involved?

**If instruments are to be purchased, please address the following issues:**

- Type of instrument(s) to be purchased; the expected cost of the instrument(s); and the name(s) of the faculty members(s) who will have primary responsibility for the instrument(s) and their experience with similar instrumentation.
- Who will use the instrument(s) and how often.
- What the instrument(s) will enable undergraduate students to do that is not possible without the instrument(s).
- Number of students who will benefit from the purchase of the instrument(s).
- Whether special facilities (i.e., extra electrical power outlets, air conditioned rooms, structural supports) will be needed to make full use of the instrument(s) and, if so, whether such facilities are currently available or attainable.
- Whether other equipment will be needed to make full use of the instrument(s) and, if so, whether such equipment is currently available, or how it will be obtained.
- In academic courses, how will the instrument(s) be integrated into the curriculum and (in a brief statement) what are the anticipated benefits.
- If the instrument(s) are to be used for research, what is the designated project, role of the undergraduate(s), and the long-term benefits of the project.

**Budget:** Show all estimated costs and cost sharing from the institution (if applicable). A budget spreadsheet template can be downloaded from the GO! website using the Download Budget Template button in the menu panel on the left. When you have completed your budget, upload it to GO! by clicking on the View, Submit Budget button in the menu panel on the left, locating your proposal in the table, and then then clicking on the upload button (up-arrow icon) in the Action column on the far right . If you need to make changes to the budget, upload a new budget sheet which will replace the original upload. You may make changes until the close of the application period.

Vendor quotes should be submitted if available. To submit a vendor quote click on the View, Submit Quote button in the menu panel on the left, locate your proposal in the table, and then then click on the upload button (up-arrow icon) in the Action column on the far right. If you have multiple vendor quotes, please combine them into one Word or PDF file or zip them into a single file before uploading.

**Cost Sharing:** 50% cost sharing is required.

**Indirect Cost Limitations:** Overhead costs are not allowed.

**Other Budgetary Limitations:** Grants may be used only to purchase scientific instruments, equipment, minor renovations, and material supplies or for curriculum development. No funds are to be used for operating expenses, personnel or service contracts. No awards will be made for teaching aids such as slide projectors or computer software. No awards will be made for personal computers that are not linked to or critical to the operation of laboratory equipment.

**Review and Award Procedures**

The primary selection criteria will be the extent to which the instrument(s), materials and proposed modifications will improve undergraduate STEM education in West Virginia by providing an innovative approach that will encourage more students to undertake careers in science, technology, engineering and math. Plans to obtain alternative sources of support for the project will also weigh in the evaluation of the proposal. Review procedures and panels typically take 4-6 weeks to complete.

Notification of awards will be made to the submitting PI and submitting organization. PIs whose proposals are declined will be advised as promptly as possible. Copies of review comments may be requested by the Principal Investigator.

### **Reporting Requirements**

All recipients of WVSR funding are required to provide a written report to WVSR after the end of the grant period. Recipients are expected to summarize the impact and outcomes of the award, final expenditures, significant insights, numbers of students served, secondary or advanced proposals to other programs other federal, private, or state programs, and overall success of the award. The report is due 60 days after the grant ending date and must be filed using the GO! system reporting function. All requests for extensions must be submitted via a grant modification form found under the Resources tab on our website (<http://wvresearch.org>).

### **Contact Information**

*For questions, please contact the program officer:*

Dr. Jan R. Taylor, Director
